

# System sheet RoofTop Silicone WT

## Description

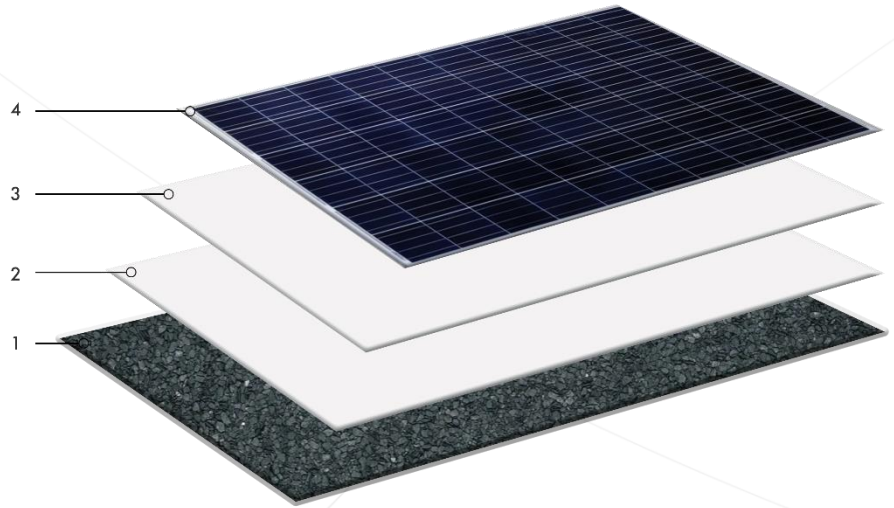

Reflective white roof coating that keeps the temperature of the roof, and consequently the indoor temperature, low.

## Application area's

- Roofs
- Underneath solar panels

## Most important properties

- Reflective
- Remains elastic
- Extended lifespan of the current roof

1. Pre-treat surface correctly
2. First layer of RoofTop Silicone WT ( $\pm 0,40 \text{ kg/m}^2/\text{layer}$ )
3. Second layer of RoofTop Silicone WT ( $\pm 0,40 \text{ kg/m}^2/\text{layer}$ )
4. Solar Panels (optional)

Before applying this system, consult the relevant product and information sheets and, if necessary, contact your technical adviser.

The stated consumption figures are indicative and based on smooth, flat surfaces. The actual consumption depends on the method, roughness and suction of the substrate.

No rights can be derived from the information on this sheet.
